CONSOLIDATED PROJECT REPORT

HTML and CSS Website Projects

Project 1	Restaurant / Cafe Website
Project 2	Online News Portal
Project 3	Movie and Rating Website

Prepared as a single report containing project descriptions, source code, and output previews.

1. Abstract

This report presents three beginner-friendly website projects developed using HTML and CSS. Each project demonstrates a different type of website layout: a restaurant/cafe page, an online news portal, and a movie listing and rating page. The HTML files provide the structure and content, while the separate CSS files control colors, spacing, typography, and layout. An output preview is included after the code for each project.

2. Objectives

• Understand the basic structure of an HTML document.
• Link an external CSS file to an HTML page.
• Use headings, navigation links, sections, cards, and footers.
• Apply CSS for page layout, colors, spacing, and text styling.
• View the rendered output of each project.

3. Tools and Technologies

HTML: Used to organize page content and page sections.
CSS: Used to style the page and control its visual appearance.
Web browser: Used to open the HTML file and view the website output.
Code editor: Any text editor or code editor can be used to edit the files.

4. Project File Structure

```
Each project folder contains:
  index.html   - HTML structure and content
  style.css    - CSS styling

Keep index.html and style.css in the same folder. Open index.html
in a web browser to view the project.
```

5. Contents

Section	Included material
Project 1: Restaurant / Cafe Website	Description, HTML code, CSS code, output preview
Project 2: Online News Portal	Description, HTML code, CSS code, output preview
Project 3: Movie and Rating Website	Description, HTML code, CSS code, output preview
6. Testing and Results	How to run and verify the projects
7. Conclusion	Summary of learning outcomes

PROJECT 1: Restaurant / Cafe Website

Project Description

A simple cafe website that displays menu items, prices, basic information, and contact details.

Main Features

• Cafe heading and tagline
• Navigation links
• Menu cards for pizza, burger, and coffee
• About and contact sections

HTML Source Code — index.html

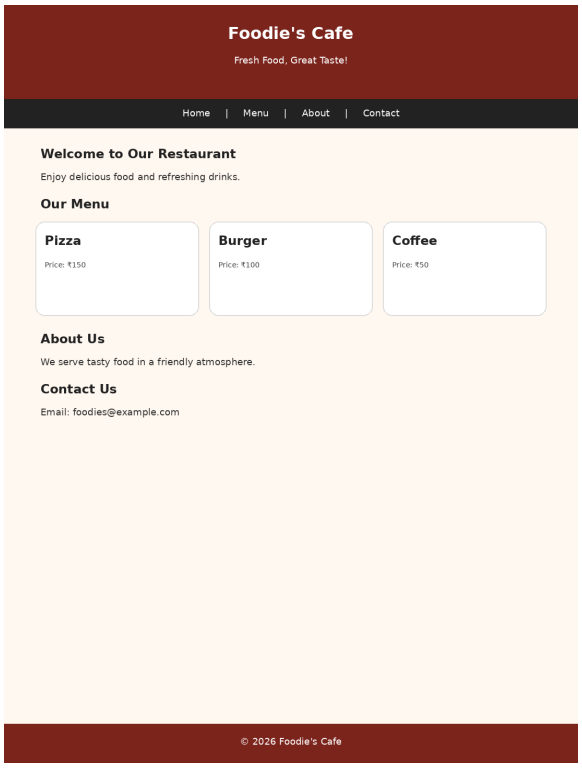

```
<!DOCTYPE html>
<html>
<head>
  <title>Foodie's Cafe</title>
  <link rel="stylesheet" href="style.css">
</head>
<body>
  <header>
    <h1>Foodie's Cafe</h1>
    <p>Fresh food, happy mood!</p>
  </header>
  <nav>
    <a href="#">Home</a>
    <a href="#menu">Menu</a>
    <a href="#about">About</a>
    <a href="#contact">Contact</a>
  </nav>
  <main>
    <section id="menu">
      <h2>Our Menu</h2>
      <div class="menu">
        <h3>Pizza</h3><p>Cheesy and delicious</p><strong>■150</strong>
      </div>
      <div class="menu">
        <h3>Burger</h3><p>Fresh and tasty</p><strong>■100</strong>
      </div>
      <div class="menu">
        <h3>Coffee</h3><p>Hot and refreshing</p><strong>■50</strong>
      </div>
    </section>
    <section id="about">
      <h2>About Us</h2>
      <p>Welcome to Foodie's Cafe, where every bite brings a smile.</p>
    </section>
    <section id="contact">
      <h2>Contact</h2><p>Email: foodies@example.com</p>
    </section>
  </main>
  <footer><p>&copy; 2026 Foodie's Cafe</p></footer>
</body>
</html>
```

PROJECT 1: Restaurant / Cafe Website (continued)

CSS Source Code — style.css

```
body {
  font-family: Arial, sans-serif;
  margin: 0;
  background: #fff8f0;
  text-align: center;
}
header, footer {
  background: #7b241c;
  color: white;
  padding: 20px;
}
nav { background: #333; padding: 12px; }
nav a {
  color: white;
  text-decoration: none;
  margin: 0 12px;
}
section { padding: 20px; }
.menu {
  display: inline-block;
  width: 180px;
  margin: 10px;
  padding: 15px;
  background: white;
  border-radius: 8px;
  box-shadow: 0 2px 5px #ccc;
}
```

Output Preview

The preview shows the page as rendered in a browser. The displayed content is sample content and can be edited in the HTML file.

PROJECT 2: Online News Portal

Project Description

A basic news portal layout that groups sample news content into clear categories.

Main Features

• Daily News heading
• Navigation for news categories
• Latest headlines
• National, sports, and technology sections

HTML Source Code — index.html

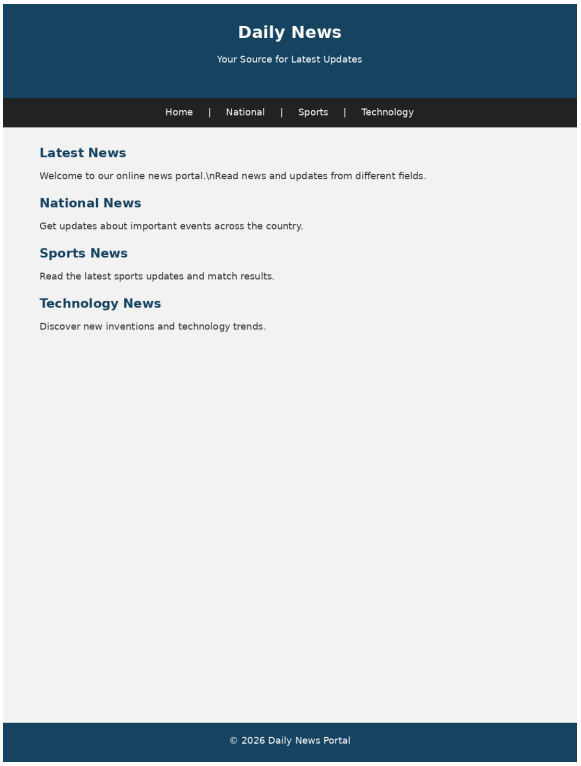

```
<!DOCTYPE html>
<html>
<head>
  <title>Daily News</title>
  <link rel="stylesheet" href="style.css">
</head>
<body>
  <header><h1>Daily News</h1><p>Your world, your news</p></header>
  <nav>
    <a href="#">Home</a>
    <a href="#national">National</a>
    <a href="#sports">Sports</a>
    <a href="#technology">Technology</a>
  </nav>
  <main>
    <section id="latest">
      <h2>Latest Headlines</h2>
      <article>
        <h3>New Discoveries in Science</h3>
        <p>Researchers share exciting updates from the world of science.</p>
      </article>
    </section>
    <section id="national">
      <h2>National News</h2><p>Updates and important stories from across the country.</p>
    </section>
    <section id="sports">
      <h2>Sports News</h2><p>Scores, match reports, and sports highlights.</p>
    </section>
    <section id="technology">
      <h2>Technology News</h2><p>New gadgets, apps, and technology trends.</p>
    </section>
  </main>
  <footer><p>&copy; 2026 Daily News</p></footer>
</body>
</html>
```

PROJECT 2: Online News Portal (continued)

CSS Source Code — style.css

```
body {
  font-family: Arial, sans-serif;
  margin: 0;
  background: #f2f2f2;
  color: #222;
}
header, footer {
  background: #154360;
  color: white;
  text-align: center;
  padding: 20px;
}
nav {
  background: #222;
  padding: 12px;
  text-align: center;
}
nav a {
  color: white;
  text-decoration: none;
  margin: 0 12px;
}
section {
  background: white;
  margin: 18px;
  padding: 18px;
  border-radius: 6px;
}
h2 { color: #154360; }
```

Output Preview

The preview shows the page as rendered in a browser. The displayed content is sample content and can be edited in the HTML file.

PROJECT 3: Movie and Rating Website

Project Description

A movie listing page that presents sample movie names, genres, and audience ratings.

Main Features

- Movie World heading
- Navigation links
- Movie cards with genres
- Ratings for three sample movies

HTML Source Code — index.html

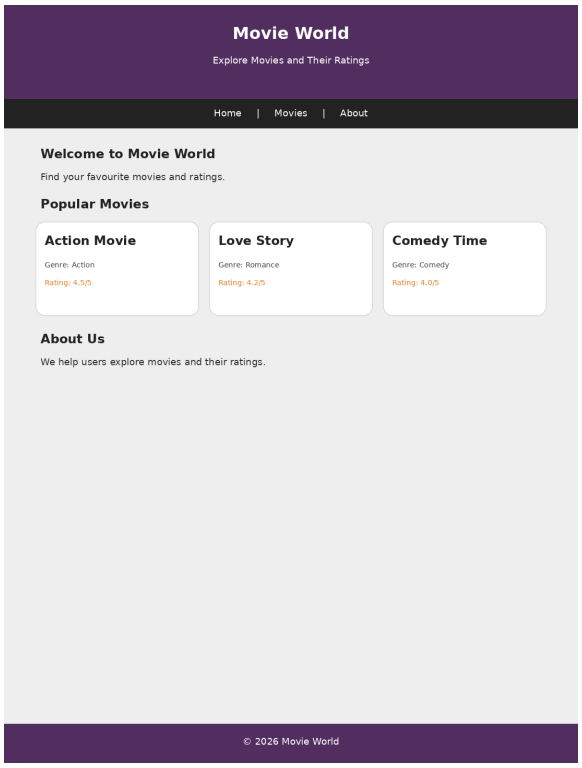

```
<!DOCTYPE html>
<html>
<head>
  <title>Movie World</title>
  <link rel="stylesheet" href="style.css">
</head>
<body>
  <header><h1>Movie World</h1><p>Discover movies and ratings</p></header>
  <nav>
    <a href="#">Home</a>
    <a href="#movies">Movies</a>
    <a href="#about">About</a>
  </nav>
  <main>
    <section id="movies">
      <h2>Popular Movies</h2>
      <div class="movie">
        <h3>Action Movie</h3><p>Genre: Action</p>
        <p class="rating">Rating: 4.5/5</p>
      </div>
      <div class="movie">
        <h3>Love Story</h3><p>Genre: Romance</p>
        <p class="rating">Rating: 4.2/5</p>
      </div>
      <div class="movie">
        <h3>Comedy Time</h3><p>Genre: Comedy</p>
        <p class="rating">Rating: 4.0/5</p>
      </div>
    </section>
    <section id="about">
      <h2>About Movie World</h2>
      <p>Explore movie details and see audience ratings.</p>
    </section>
  </main>
  <footer><p>&copy; 2026 Movie World</p></footer>
</body>
</html>
```

PROJECT 3: Movie and Rating Website (continued)

CSS Source Code — style.css

```
body {
  font-family: Arial, sans-serif;
  margin: 0;
  background: #eee;
  text-align: center;
}
header, footer {
  background: #512e5f;
  color: white;
  padding: 20px;
}
nav { background: #222; padding: 12px; }
nav a {
  color: white;
  text-decoration: none;
  margin: 0 12px;
}
section { padding: 20px; }
.movie {
  display: inline-block;
  width: 220px;
  margin: 10px;
  padding: 15px;
  background: white;
  border-radius: 8px;
  box-shadow: 0 2px 5px #ccc;
}
.rating {
  color: #e67e22;
  font-weight: bold;
}
```

Output Preview

The preview shows the page as rendered in a browser. The displayed content is sample content and can be edited in the HTML file.

6. Testing and Results

To test each project, save the HTML code as **index.html** and the CSS code as **style.css** inside the same project folder. Open index.html in a modern web browser. Check that the heading, navigation links, content sections, cards, and footer appear, and confirm that the CSS colors and spacing are applied. If styling does not appear, check that the stylesheet link uses the exact file name **style.css**.

7. Conclusion

These three projects provide practice in creating structured web pages and styling them with CSS. The restaurant project demonstrates menu cards and contact information, the news portal demonstrates category-based content sections, and the movie website demonstrates item cards with ratings. Keeping HTML and CSS in separate files makes the projects easier to read, update, and maintain.
